

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Jötunn Global Macro Low Volatility Fund

Class E - USD Shares (LU1808435827)

a sub-fund of Alpha UCITS SICAV

MDO Management Company SA is the SICAV management company for this fund

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The sub-fund's objective is to provide shareholders with superior risk-adjusted absolute returns uncorrelated from bonds and equities.

Investment Policy

The sub-fund invests on an active basis in G10 currencies (the ten most traded currencies in the world) only primarily after news events, in particular monetary policy decisions and data releases, affecting G10 currencies. These currencies are the Euro, US Dollar, Japanese Yen, British Pound, Swiss Franc, Australian Dollar, New Zealand Dollar, Canadian Dollar, Swedish Krona and Norwegian Krone. The remaining assets will be held in cash, cash equivalent investments and short-term bonds issued by G10 currencies governments. When not trading currencies or when required by conditions in the financial markets, the sub-fund may invest up to 100% of its assets in cash, cash equivalent investments and short-term bonds issued by G10 currencies governments.

The investment strategy employed by the sub-fund can be classified within the "global macro" category of absolute return strategies: the sub-fund invests on an active basis in G10 currencies (the ten most traded currencies in the world) primarily after news events, in particular monetary policy decisions and data releases, affecting G10 currencies.

The global exposure of the Sub-fund will be calculated on the basis of the absolute VaR approach. The leverage of the Sub-fund calculated as the sum of the notionals of the financial derivative instruments used is expected to range between 0% and 100% and this leverage will derive mainly from derivatives used for currency hedging. This range is not meant to be binding limits. In exceptional circumstances the leverage of the Sub-fund may temporarily be higher.

Investors should note that FX spot transactions will be executed on margin and hence carry economic leverage. The economic leverage, calculated as the sum of FX transactions' notionals, shall not exceed 250% of NAV.

Fund Currency

The reference currency of the sub-fund is the EUR and the share class currency is the USD.

Subscription and Redemption

Investors may purchase or sell shares of the sub-fund fund on a daily basis (Luxembourg & London business days).

Distribution Policy

Income generated is reinvested.

RISK AND REWARD PROFILE

Risk Disclaimer

The risk and reward indicator illustrates where the sub-fund is positioned in terms of its possible risk and reward. The higher the sub-fund's position on this scale, the greater the possible reward, but also the greater the risk of losing money. Even if the sub-fund is in the lowest risk class you can lose money as no investments are entirely risk free. The risk indicator is calculated using historical data and therefore cannot be used as a prediction for the future. The risk classification may change over time.

Why is this Sub-Fund in this category?

The sub-fund is subject to a low level of risk being linked to typical risks of securities markets, such as the macro-economic

trends at global level, the level of inflation and interest rates, the evolution of corporate income, the issuers' stability and currency fluctuations. At this time, the level of the risk and reward profile is equal to 2.

Not all risks affecting the sub-fund are adequately captured by the synthetic risk indicator. The following risks may affect the sub-fund:

Operational risk - That may occur due to technical issues for example natural disasters and fraud.

Currency risk - When the sub-fund invests in assets denominated in a different currency. A devaluation of the asset's currency relative to the currency of the sub-fund will lead to a reduction in the value of the sub-fund.

Full details of all risks the sub-fund is exposed to are provided in the Prospectus.

CHARGES FOR THIS FUND

The charges investors pay are used to cover the cost of running the fund, including the cost of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges that may be taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money –

Charges taken from the Fund over a year

Ongoing charge	2.92%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	15.00% a year of any returns the fund achieves above the High Water Mark. In the fund's last financial year the performance fee was 0.00% of the Net Asset Value of the fund.
-----------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

The ongoing charges may vary from year to year and include investment management (if applicable), management, administration and depositary fees. They do not include portfolio transaction costs and performance fees.

The ongoing charge is an estimate based on the fees disclosed in the prospectus.

More information about the charges can be found in the Prospectus of the fund.

Additionally, in case of a switch from one sub-fund to another sub-fund of Alpha UCITS SICAV, a conversion fee of up to 1% may be levied to cover conversion costs.

A dilution levy up to 2% may be applied.
